

Consort Air Technology

Client

Our client, **Consort Air Technology** were working on behalf of the end user of the building & flue, **Miele Ltd.**

Project

For this particular project, our brief was to design, supply and install a suitable venting system to serve the proposed gas-fired commercial clothes iron. The iron was to be situated within the client's test centre when in use for demonstration purposes, but needed to be easily disconnected to allow for it to be removed to make space for other equipment.
