

# Flue Design & Support for Merchant & Installer

# ChimFlue

Whether you're a **boiler engineer** installing single or multiple boilers, or a **merchant** with a customer who needs assistance with a flueing project, we've got the experience and expertise you need on call 24/7\*.

### Flue Technicians:

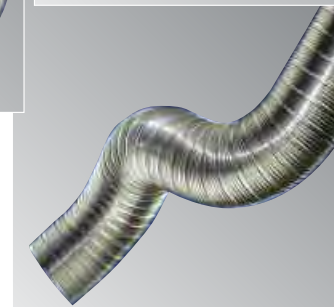

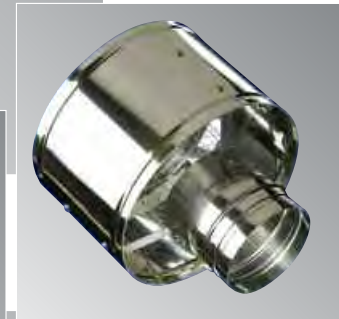

Our **flue technicians** are trained and ready to assist with experience of almost every flueing situation you can think of. Technicians are available at both our Hatfield and Andover sales offices and can be contacted instantly over the phone or via email or fax. We have trade counters at both branches where you can drop in for expert advice and assistance.

### Flue Stock & Delivery:

We carry many ranges of flue and ancillary components in stock at each depot including flexible flue liner and rigid sectional condensing flue and can ship to anywhere in the UK overnight so that you receive your goods next working day – before 10.30am if required!

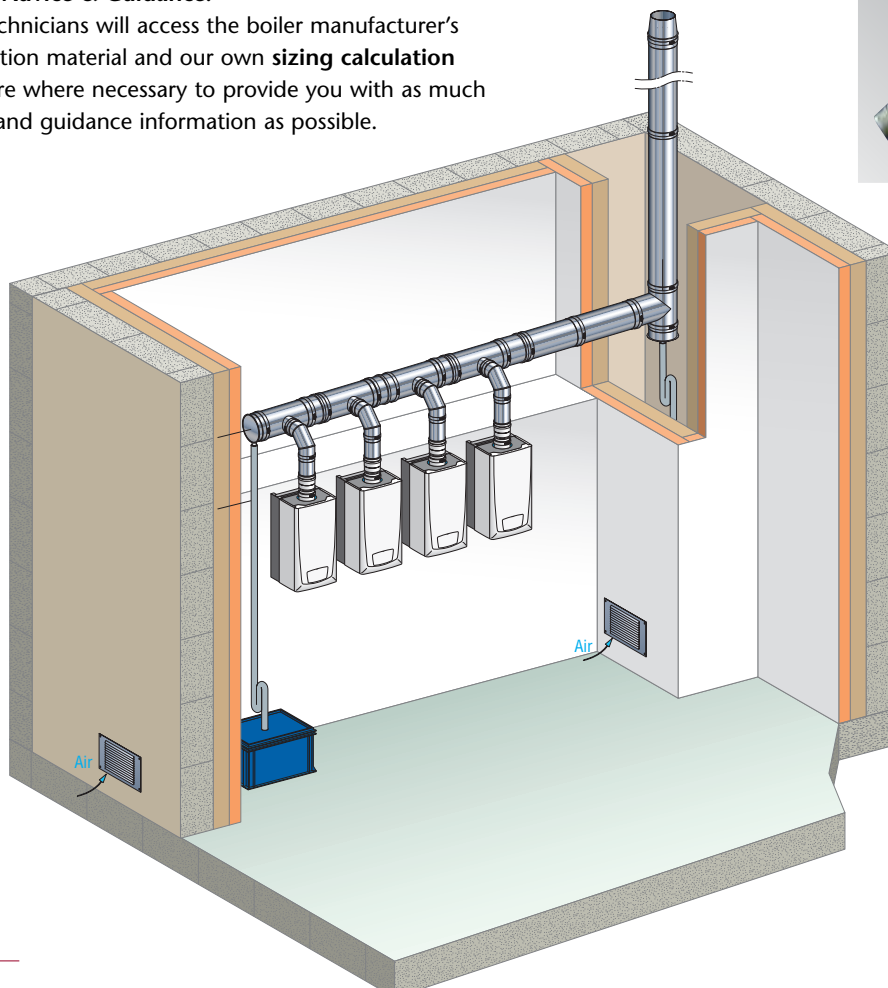

### Sizing Advice & Guidance:

Our technicians will access the boiler manufacturer's installation material and our own **sizing calculation** software where necessary to provide you with as much sizing and guidance information as possible.

## Rapid CAD Design:

Our CAD trained technicians can take dimensions over the phone or from a rough sketch and turn them into a design drawing for your approval. We use drawing blocks supplied by major flue manufacturers so we can drop and join individual items to produce a drawing that will take much of the guesswork out of your installation and help ensure you get it right first time. We can even put your company name or logo in the drawing title box and send you the finished drawing for use on your project.

## Flue Specials Manufacture:

At our manufacturing facility in Andover we've been designing and turning out high quality flue components and support items for decades now. We pride ourselves on our ability to provide same-day service and turnaround. With most specials we can usually manufacture and ship if not overnight, then within a few working days at most!

## Exodraft Fans & Controls:

Chimflue is a multi award winning **Exodraft Technology Centre** with over a decade of practical experience of providing technical support and installations. We design, supply and install fan solutions for commercial and domestic applications including single or multiple boilers, gas fires, solid fuel fires, biomass boilers etc. [www.exodraft.co.uk](http://www.exodraft.co.uk)

## Biomass:

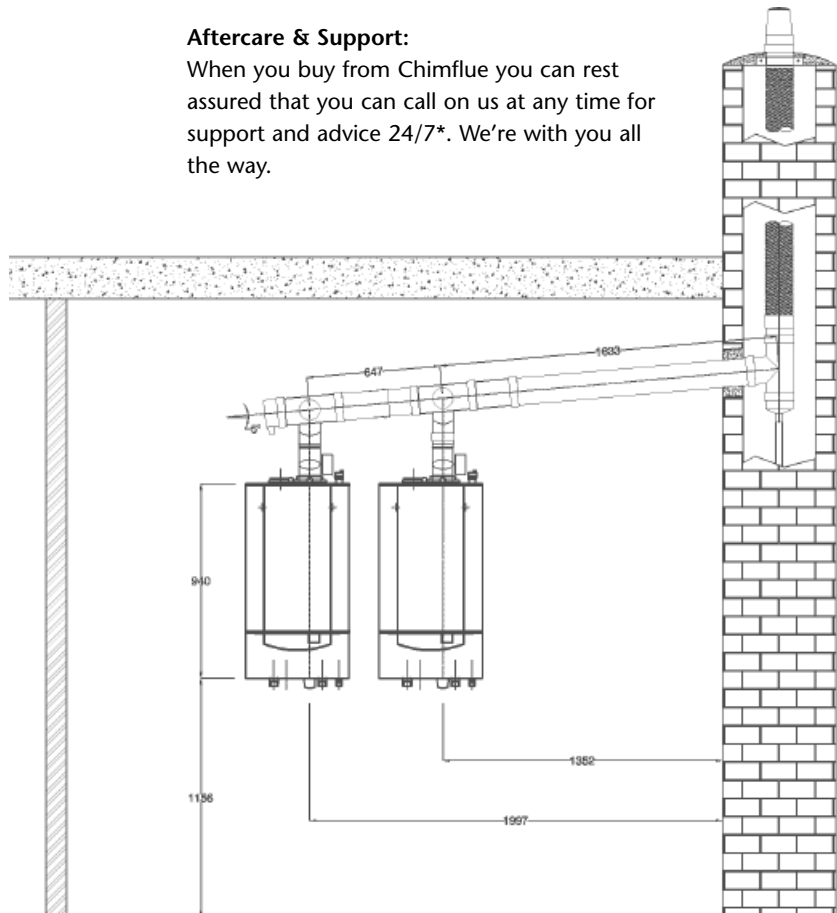

Biomass boiler systems are increasingly being used for both domestic and commercial applications. As with most technological advances toward greener and more sustainable heating solutions these days, the flueing requirements can often be less than totally clear at first. At Chimflue we make it our business to stay ahead of the changes, and we are more than happy to help you to do the same.

## Site Survey:

For those jobs where information is not available or just plain difficult to assess, ask about our site survey service. We have commercial sales engineers who carry out site surveys for quotation. Whether it's a parts supply only, or a supply and fit solution that you need, you've come to the right place.

## Aftercare & Support:

When you buy from Chimflue you can rest assured that you can call on us at any time for support and advice 24/7\*. We're with you all the way.
